- Data Science
- Web Development
- App Development
- Server & Computer Network Engineering
- Cybersecurity
- Software Engineering
- Artificial Intelligence and Machine Learning

Hobbies

- Poetry
- Travelling
- Beatboxing
- Sketching

Languages

- Python
- Javascript
- Java
- Shell Scripting
- C/C++
- Assembly

Meticulous Programmer & AI/ML professional with significant experience that spans over 8 years primarily within web development, systems administration, network operations, artificial intelligence, and machine learning. Background serving as a project manager with heavy involvement in delegating tasks, managing communications between team members, and ensuring that deliverables are complete ahead of schedule and within budget without sacrificing quality. Currently seeking an AI/ML Software Development role within a company that will view my skill set as beneficial and a valuable addition to their team.

Work Experience

Digital Shadows
(Oct 2021 - Present)

Intelligence Collection Analyst

•Used extensive knowledge gained from personal projects to assess severity for potential threats to company clients.
•Created several rules to filter threat incidents and increase company signal-to-noise ratio.
•Completed training in several cybersecurity related fields such as reverse engineering and web app security.
Key Achievement: Quality of coverage directly increased percentage of clients working with Digital Shadows for every quarter since joining.

Self-study
(Aug 2019 - Present)

DevOps Researcher

•Serve as a researcher for this self-initiated project designed to learn the basics of virtualization, networking operations, and self-hosting.
•Virtualized Windows 10 and several Linux distros via QEMU/KVM with PCIe passthrough.
•Virtualized pfSense to manage traffic to and from VMs and to learn about networking.
•Set up several docker containers in a micro-services architecture.
•Configured a reliable, RAID-6 data storage system with redundancy and backups.
•Configured a reverse proxy and VPN tunnel to remotely access home server over WAN.
Key Achievement: Learned about Linux on the server, OSI Networking Model, Server Architectures, Microservices Architecture, and Virtual Desktop Infrastructure.

University of Houston - Clear Lake
(Aug 2020 - Dec 2020)

ML Capstone Project Team Lead

•Served as the team leader charged with creating an application that allowed users to create a list of companies to track and would predict the stock price of the listed companies.
•Predictions based on historical financial data and the sentiment of recent articles published about said company.
